EDUCATION

SIES College of Arts, Science

- Master of Computer Science
- CGPA - 8.6/10

Vk Krishna Menon College Of Commerce, Economics & Science

- Bachelor of Computer Science
- GPA: 7.59 / 10

SKILLS

– Data & BI Tools:

Power BI, Tableau, Advanced Excel (Pivot Tables, Macros, VLOOKUP, Automation), SQL

– Data Management & Analysis:

Data Cleaning, Data Modeling, SKU Mapping, Stock Forecasting, PO & Procurement Analysis, E-commerce Data Reporting

– Automation & Workflow Tools:

Excel VBA, Power Query, Automated Reporting Macros

– Programming & Platforms:

Python (Pandas, NumPy), Git/GitHub, MS SQL Server, MongoDB

– Visualization & Dashboarding:

Dashboard Design, Interactive Visualization, Performance Metrics Tracking

– Cloud & Applications:

Microsoft Office Suite, Google Workspace, Amazon Vendor Central, Inventory Management Platforms

– Core Strengths:

Inventory Planning, Trend Forecasting, Data Accuracy & Validation, Analytical Problem Solving

CERTIFICATES

- NPTEL Python for Data Science
- AWS Cloud Practioner Essentials
- Google Cloud Data Analytics
- Foundations of Deep Learning
- Data Visualization with Power BI
- Data Analytics with tableau
- Foundations of UI/UX designing
- Google Data Analytics Professional Certificate (Coursera)
- Supply Chain Analytics (Coursera)

PROFILE

Detail-oriented and data-driven professional currently working as an Inventory & Data Analyst at Sounce along with a post-graduate degree in Computer Science. Skilled in managing large-scale product databases and maintaining enterprise-wide sales and inventory intelligence systems. Experienced in SKU mapping, stock forecasting, and macro-based automation to improve operational efficiency. Proficient in building interactive dashboards for product performance tracking and providing analytical insights to support strategic inventory planning and procurement. Passionate about leveraging data to streamline e-commerce operations and ensure zero stock discrepancies across platforms.

WORK EXPERIENCE

SOURCE RETAIL PVT LTD DATA ANALYST

FEB 2025 - PRESENT

- Contribute to the enterprise-wide Sales & Inventory Intelligence Platform, ensuring end-to-end accuracy of stock data across all product categories.
- Manage and maintain the centralized inventory sheet containing complete product information — including SKU-level stock tracking, cost, quantity, and availability.
- Execute Master SKU implementation and mapping across multiple marketplaces and internal databases to maintain structured and unified product information.
- Regularly monitor stock movement, product performance, and reorder levels, ensuring optimum stock availability and zero stockouts.
- Perform demand forecasting and consumption trend analysis to predict inventory requirements and raise timely Purchase Orders (POs) based on data-backed insights.
- Designed and developed interactive Power BI and Excel-based dashboards for leadership to monitor real-time sales performance, stock status, and SKU-level analytics.
- Built and managed interactive dashboards to visualize real-time sales, stock status, and product-wise performance across platforms.
- Uses Excel macros and automation tools to streamline daily data updates, eliminating manual errors and improving reporting efficiency.
- Coordinate with category and operations teams to align stock levels, product mapping, and order planning.
- Contribute to strategic decision-making through inventory analytics, performance tracking, and actionable insights for better demand planning and supply chain optimization

ARTIFICIAL INTELLIGENCE INTERN – INFOTECH JULY 2024 - SEPTEMBER 2024

- Developed and deployed an AI-powered chatbot to automate FAQ responses, enhancing team efficiency and response accuracy.
- Gained practical experience in handling large datasets, applying statistical techniques, and improving data model performance.

ARTIFICIAL INTELLIGENCE INTERN – INFOTECH

JANUARY 2024 - FEB 2024

- Built responsive React.js web applications (Gym Application, Sudoku game) using HTML5, CSS3, and JavaScript with improved page load and responsiveness.
- Integrated RESTful APIs for real-time weather and content updates, optimizing data flow and user experience.

PROJECTS

Power Bi Projects (Financial Analysis Dashboard): Developed a Financial Analysis Dashboard in Power BI to track revenue, expenses, and profitability metrics. Acquired skills in Data modeling, DAX functions, interactive dashboard creation.

Flipkart sales visualization: Performed data cleaning, transformation, and modeling for unified reporting and designed interactive dashboards for leadership to track top-performing and underperforming products.

AI-Powered Customer Support Chatbot (React + OpenAI API) – Real-time query handling bot.

Android Development: Project food waste management: Developed a Food Waste Management Android App to track surplus food and connect donors with NGOs for efficient distribution
