Data Analyst with professional experience in e-commerce analytics, returns & dispute management, stock management, BI dashboarding, and application development, backed by a postgraduate degree in Computer Science. Skilled in SQL, Power BI, Tableau, Python, MERN stack, and cloud platforms (AWS), with hands-on expertise in building ETL pipelines, workflow automation, role-based management system. Designed an enterprise-wide Master SKU analytics platform that improved decision-making and increased returns recovery by 180% through automation and visualization. Experienced in developing bots, OCR-based solutions, and scalable full-stack applications. Adept at bridging data analytics and technology development to deliver actionable insights and scalable solutions for organizational growth.

EDUCATION

SIES College of Arts, Science

- Master of Computer Science
- CGPA - 8.4/10

SIES College of Arts, Science

- Bachelor of Computer Science
- GPA: 8.6 / 10

SKILLS

- Data & BI:** SQL (T-SQL, Stored Procedures, Views), Pivot Tables, Power BI (DAX, Power Query), Tableau, Advanced Excel (VBA/Macros, Vlookup)
- Data Engineering:** ETL pipelines, Python (pandas, NumPy), Data Modeling, Multi-platform SKU Harmonization
- Tools:** Git/GitHub, Azure DevOps, SQL Server, MongoDB
- Cloud platforms:** AWS (EC2, S3), Azure fundamentals (knowledge of Azure Storage and App Service), Netlify, Vercel
- Microsoft Office 365 (Excel, PPT, Word)
- Blockchain fundamentals
- Data Visualization, Cleaning, Transformation Pipeline
- Inventory stock Analysis and Forecasting
- Amazon Vendor Central
- Dispute and Returns Management
- Machine Learning Algorithms
- Flutter, Html, CSS, GitHub and version Control

CERTIFICATIONS

- NPTEL Python for Data Science
- AWS Fundamentals
- Google Cloud Data Analytics
- Foundations of Data Science
- Data Visualization with Power BI
- Data Analytics with Tableau
- SQL for Data Science (Coursera)
- Kaggle Micro-Certifications
- Supply Chain Analytics (Coursera)
- Google Data Analytics Professional Certificate (Coursera)
- SQL (HackerRank / Coursera Verified Intermediate Certificate)
- Blockchain Basics — Coursera

WORK EXPERIENCE

Sounce Retail Pvt LTD Data Analyst | Data Platform Developer

FEB 2025 - PRESENT

Enterprise-Wide Sales & Inventory Intelligence Platform :

- Architected a full-scale Power BI + SQL Server analytics solution giving leadership real-time insight into top/low performing products, stock levels, and SKU-level trends.
- Engineered a unified Master SKU data warehouse: created and validated platform-specific master sheets (Amazon, Flipkart, JioMart, Blinkit, Shopify, Cred, Zepto); enforced cross-platform SKU consistency; performed multi-stage validation against Amazon DP pages, Vendor Central, and internal inventory sheets.
- Built ETL pipelines in Python+SQL to ingest and clean daily data, feeding parameterized SQL views and DAX measures for advanced analytics.
- Designed Power BI, Tableau dashboards for leadership, enabling 20% faster decision-making on top-performing and low-performing SKUs, stock forecasting, and sales trend analysis.
- Reduced manual data compilation by 90% and improved reporting accuracy and accessibility across team
- Business Impact:** Reduced manual reconciliation to near-zero, cut decision-making time by 20%, and decreased stock-out incidents through accurate forecasting.
- Amazon Returns & Dispute Analytics** - Good knowledge & practical experience working with Amazon vendor central.
- Streamlined dispute workflows and analytics, increasing successful monthly returns recovery from ₹2.5 L → ₹7 to 8 L (≈190% growth).
- Created Excel & Power BI reports to identify recurring issues and optimize supplier communication.
- Automation & Application Development :**
- Developed a Python + Tesseract OCR bot to automate dispute-folder creation, reducing manual effort.
- Automated data collection from 7+ e-commerce platforms by building web scrapping Python bots.
- Currently building a role-based internal management system (Node.js + React + SQL Server backend) so department heads can securely access and update only their own modules—inventory, sales, finance—using the unified Master SKU data.
- Embedded live Power BI reports, unifying analytics and daily operations in one application.

Artificial Intelligence Intern – Infotech

JULY 2024 - SEPTEMBER 2024

- Applied Python, pandas, NumPy, and scikit-learn to build and evaluate machine-learning models for predictive analytics.
- Developed and deployed an AI-driven chatbot to automate FAQ responses. Conducted data preprocessing and feature engineering on large datasets, strengthening understanding of data-science pipelines and model optimization.

Web Development Intern – Unified Mentor Pvt Ltd

JANUARY 2024 - FEB 2024

- Built responsive React.js web applications (Music Player, Weather App) using HTML5, CSS3, JavaScript, improving page load times and UI responsiveness also implemented REST API calls to fetch live weather data and dynamic content.
- Strengthened fundamentals in version control (Git) and cross-browser compatibility testing.

PROJECTS

- Data Analytics & Visualization, Power BI** - Full scale company sales visualization for multiple platforms. Performed data cleaning, transformation, and modeling for unified reporting and designed interactive dashboards for leadership to track top-performing and underperforming products.
- Tableau** - Swiggy Sales Overview, Integrated sales data from Swiggy platform to perform data cleaning, transformation and modeling to create a unified report that could visualize the top performing products of the company from the low selling products.
- Enterprise Management Portal (MERN + SQL + Power BI Embedded)** – Secure ERP-style application integrating analytics.
- AI-Powered Customer Support Chatbot (Node.js + OpenAI API)** – Real-time query handling with MongoDB logging.
- Machine Learning Projects:** Heart Stroke prediction and Skin-Cancer cell image prediction. Created a Heart-stroke predicting ML model using different ML algorithms based on various inputs entered.
