

PROFILE

Hybrid Data + Tech professional with professional experience in e-commerce analytics, returns handling, data visualization, stock management and Full Stack Development. Computer Science postgraduate with expertise in MERN stack, API integration, and system design. Built scalable applications integrating AI APIs (OpenAI, Gemini) and automated dispute workflows with Python bots. Experienced in building real-time web and mobile applications, and insightful visualizations for data analysis delivering measurable efficiency gains with strong system design knowledge. Skilled in automating workflows with Python and OCR, SQL, Power BI, Tableau, and Excel for data cleaning, dashboard creation, data manipulation and forecasting. Able to demonstrate ability to work collaboratively in teams as well as effectively self-manage independent projects..

EDUCATION

SIES College of Arts, Science & Commerce
MSc Computer Science (2023 – 2025) – 8.40
SIES College of Arts, Science & Commerce
BSc Computer Science (2020 – 2023) – 8.35

TECHNICAL SKILLS

- Data Analysis & BI: Python, SQL, Power BI, Tableau, Excel
- Full Stack Development: MERN (MongoDB, Express, React, Node), flutter, html, CSS, Android development
- Automation & AI: Tesseract OCR, API Integration (OpenAI, Gemini, E-commerce APIs)
- Machine Learning: scikit-learn, pandas, predictive modeling
- Domain Knowledge: E-commerce analytics, Returns optimization, Inventory forecasting.
- Expertise in all The Microsoft office 365 apps

TECHNICAL SKILLS

NPTEL Python for Data Science TCS Excel
Google Cloud Data Analytics
AWS Certified Cloud Practitioner
Data Analytics with tableau
SQL for Data Science (Coursera)
Kaggle Micro-Certifications
Supply Chain Analytics (Coursera)
Google Data Analytics Professional Certificate (Coursera)
Meta Front-End Developer Professional Certificate (Coursera)
Meta Back-End Developer Professional Certificate (Coursera)

SONU RAJENDRAN

MUMBAI, INDIA | 9136800446 | SONURAJENDRAN2@GMAIL.COM | [LINKEDIN.COM/IN/SONU-RAJENDRAN-021914247](https://www.linkedin.com/in/sonu-rajendran-021914247)

WORK EXPERIENCE

Data Analyst

Source Retail Pvt Limited -- Feb 2025–Present

- Skilled in handling dispute management and returns through amazon vendor central, increased returns recovery revenue from ₹2.5 Lakhs/month → ₹7 Lakhs/month through automation and structured dispute management.
- Automated data collection from 7+ e-commerce platforms using Python bots, saving 20+ hours/week.
- Developed a Python AI + Tesseract OCR bot to auto-create dispute folders → reducing manual processing time by 60%. Integrated various ML algorithms to train and test the bot to carefully classify the images and the captions from the images in order to create collages of the products.
- Designed Power BI dashboards for leadership, enabling 20% faster decision-making on sales trends and low-performing SKUs. Building Power BI dashboards to track sales performance, top-performing/low-performing products across all the platforms by handling multiple sheets and going through all of the data cleaning and transforming process to get it ready for visualization.
- Kept track of the products complete stock sheets and improved inventory availability by 25% and reduced stockouts in top SKUs. Integrated e-commerce APIs for automated data pipelines and real-time reporting.

Artificial Intelligence Intern

Infotech -- July 2024 - September 2024

Created AI-driven chatbots with Python + ML algorithms, reducing customer query resolution time

Web Development Intern

Unified Mentor Pvt Ltd -- January 2024- Feb 2024

Built Weather App & Music Player with React.js & APIs. Enhanced frontend using TailwindCSS, Bootstrap.

EDUCATION

Data Analytics & Visualization

---Power BI – (Full scale company sales visualization for multiple platforms)

- Integrated sales data from Amazon, Flipkart, JioMart, Blinkit, Shopify, Cred, and Zepto. Performed data cleaning, transformation, and modeling for unified reporting and designed interactive dashboards for leadership to track top-performing and underperforming products. Enabled decision-makers to monitor revenue trends, stock movement, and OOS prevention in real-time.

---E-commerce Sales Dashboard (Tableau): Analyzed sales trends and customer behavior across platforms.

Netflix Userbase Subscription Analysis(PowerBI), Financial BudgetTracker(Excel)

Machine Learning and Mern stack projects

---Heart Stroke prediction –

Created a Heart-stroke predicting ML model using different ML algorithms based on various inputs entered.

Polished my skills in understanding ML/AI algorithms, python libraries, how data is prepared for EDA, data analysis & visualization.

---Skin-Cancer cell image prediction –

Objective is to create a ML model which could bifurcate between normal cell and cancer cell images which would help in predicting whether the user is likely facing cancer risk or not.

---Inventory & Order Management System (MERN Stack) –

- Developed a full-stack web application using MongoDB, Express.js, React.js to manage inventory, track stock levels, and process customer orders. Implemented role-based authentication (Admin, Seller, Customer)
- Created RESTful APIs for product catalog, order placement, and stock updates.
- Integrated real-time stock tracking to prevent out-of-stock issues (inspired by actual e-commerce challenges).
